Student Support Home

FOLLOW THESE ACTIONS

1. Click Student Support Home in the left sidebar.
2. Optionally choose “Under pressure” to show the session-only check-in.
3. Point to the Chat, Study Reset, and Support Directory entry cards.

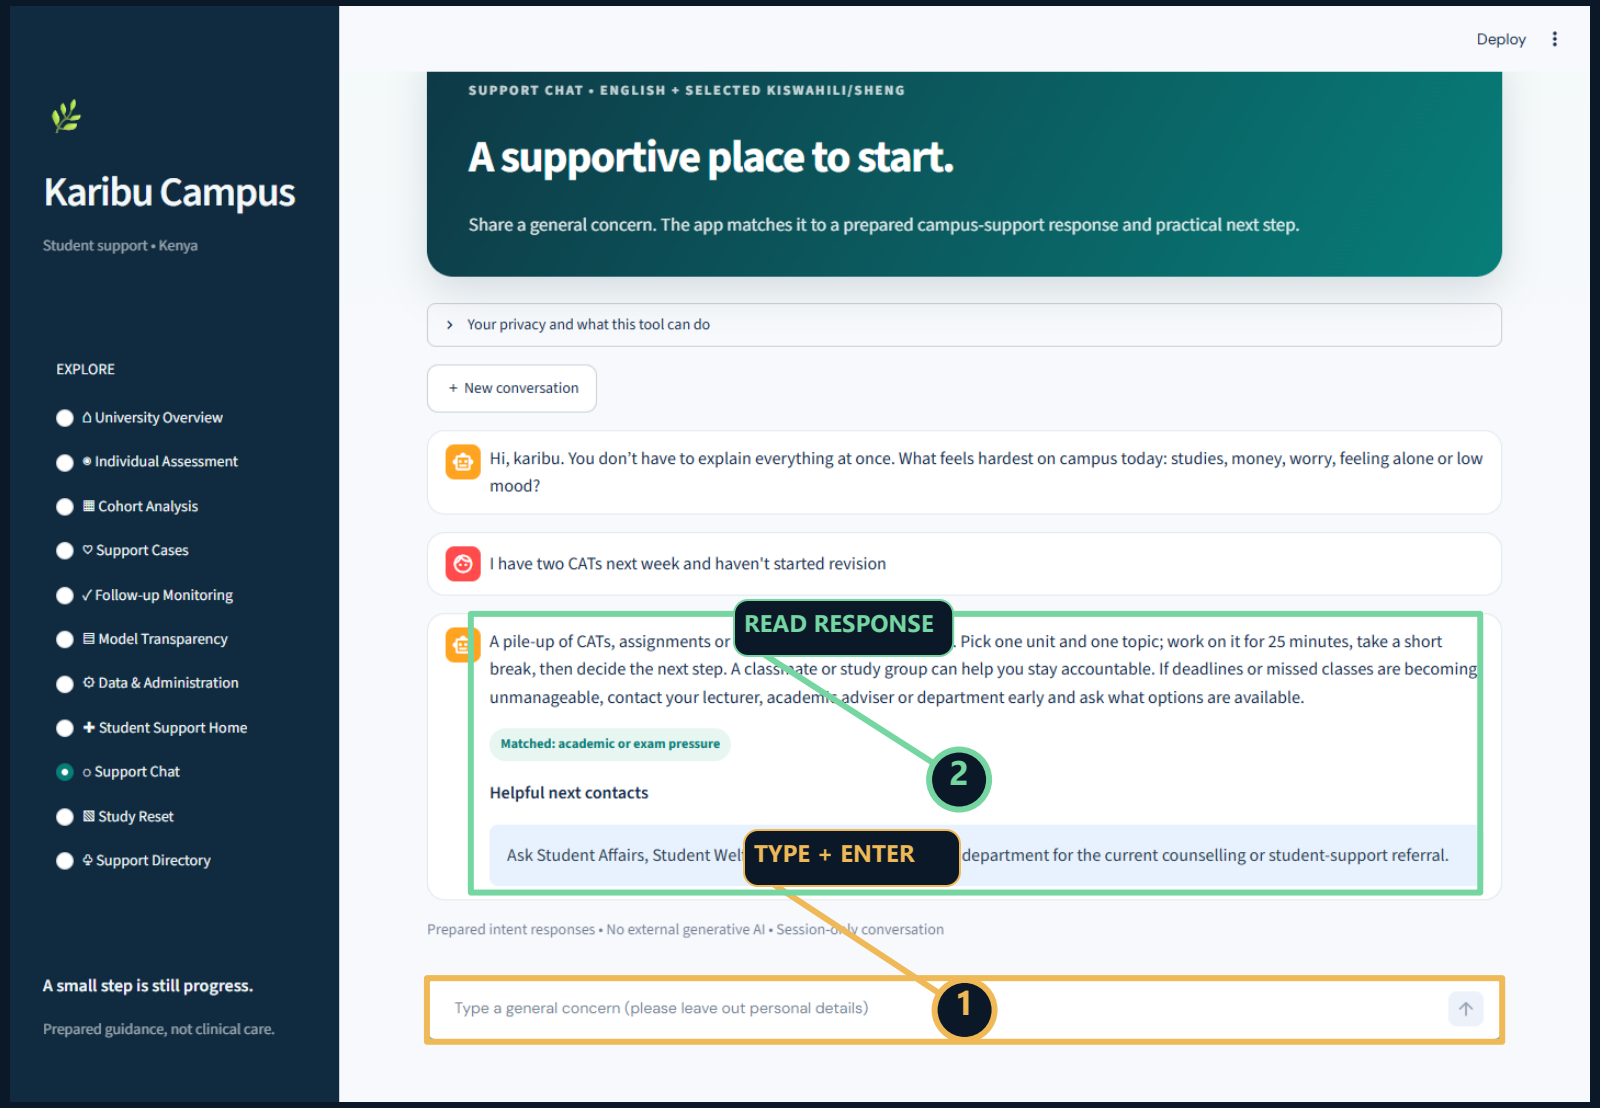

SAY

“A calm starting point, with a small next step and a route to people.”

LOOK FOR Optional check-in; three support routes.

Open the hosted app early if Render needs time to wake.

Support Chat: CAT-pressure example

FOLLOW THESE ACTIONS

1. Select Support Chat in the sidebar.
2. Enter the CAT sample shown here, then press Enter.
3. Point out the matched intent and prepared response.

SAY

"A pile-up of CATs can feel overwhelming. The reply suggests one practical first step."

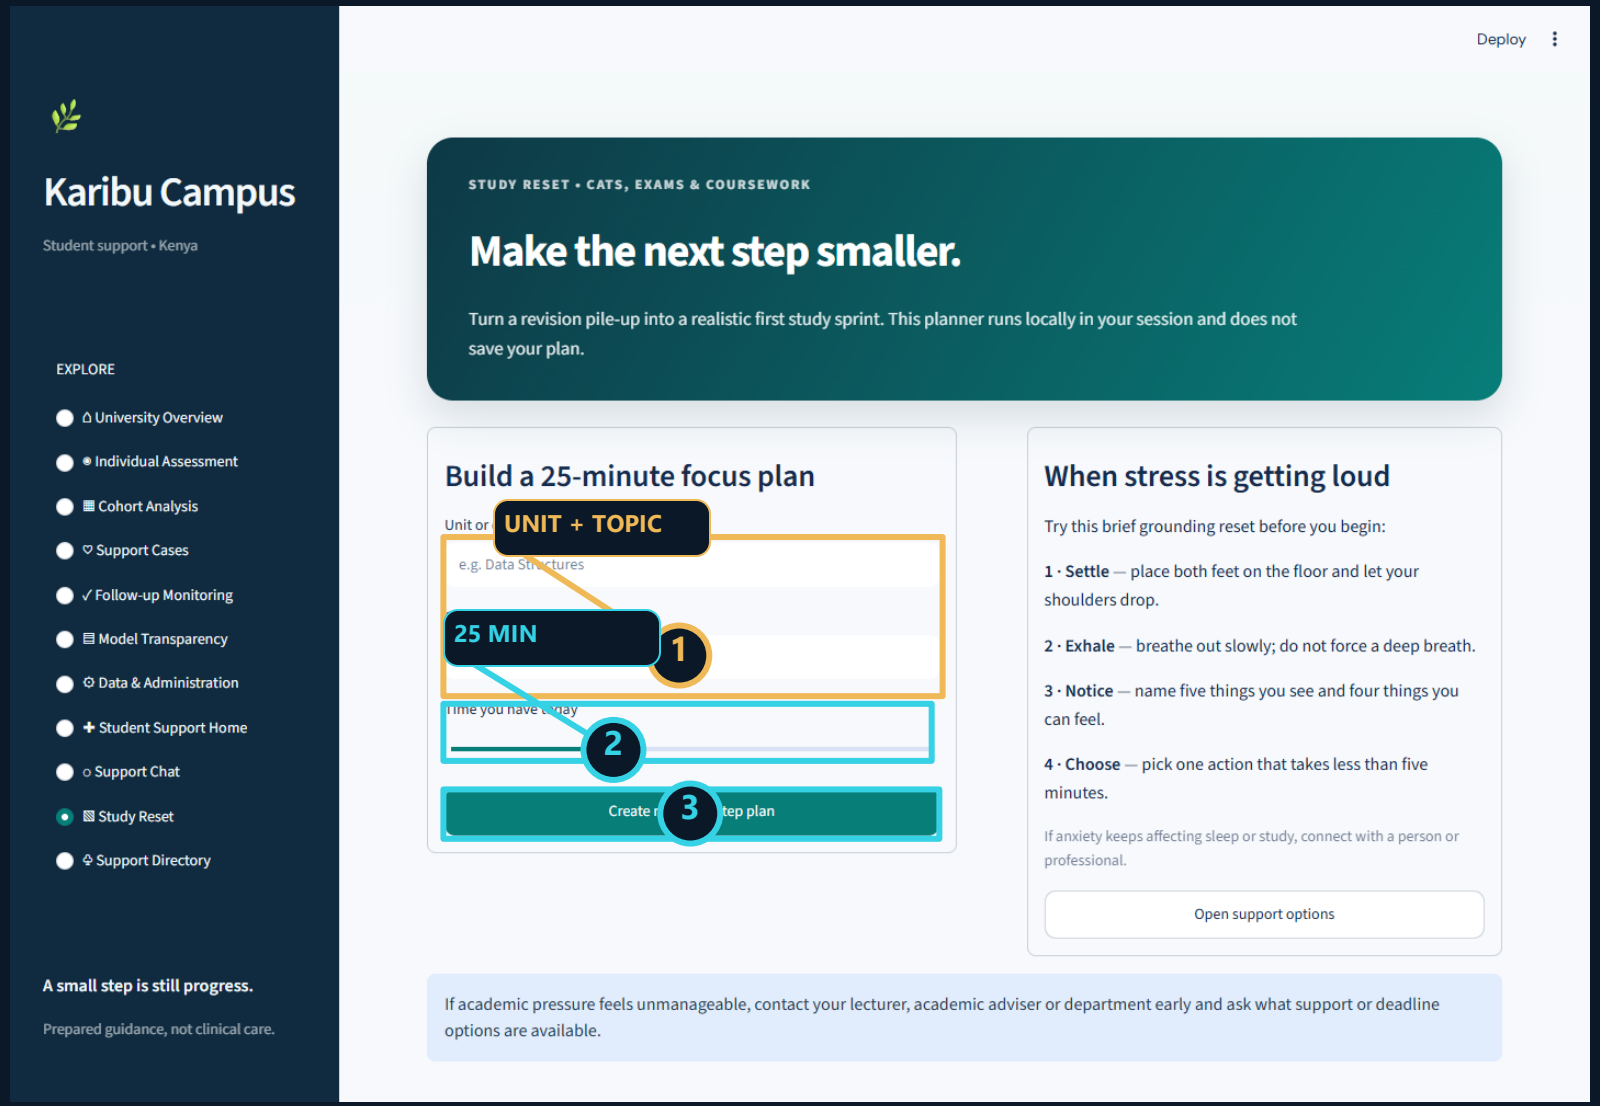

SAMPLE TO TYPE

I have two CATs next week and haven't started revision.

LOOK FOR Intent tag + response; no LLM.

Do not enter names, IDs, HELB logins, or M-Pesa PINs.

Study Reset planner

FOLLOW THESE ACTIONS

1. Unit: optional. Enter “Data Structures.”
2. Topic: “revise linked lists”; keep 25 minutes.
3. Click Create my small-step plan. Output appears below the form.

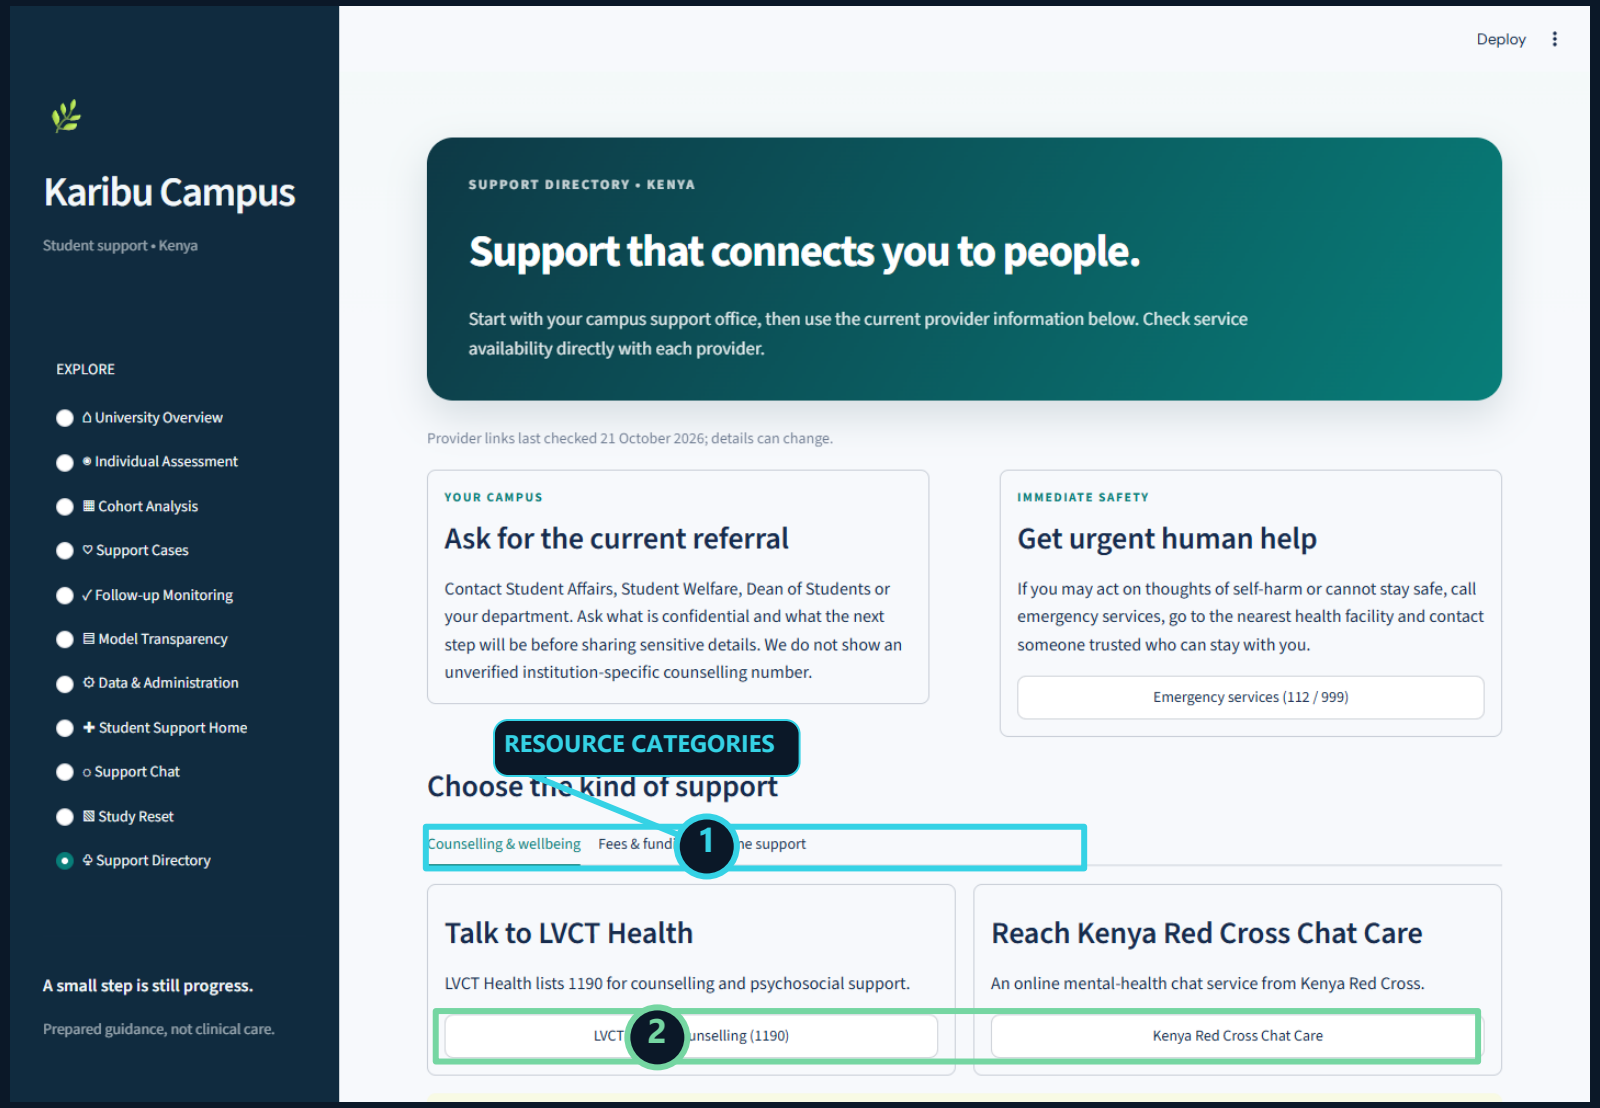

SAY

“One topic, one short focus block, then a break and a next step.”

LOOK FOR Focus task + four practical steps.

The plan is session-only; it is not a timer or saved calendar event.

Support Directory

FOLLOW THESE ACTIONS

1. Select Support Directory in the sidebar.
2. Show campus and immediate-safety guidance.
3. Click Fees & funding for HELB; identify the other tabs.

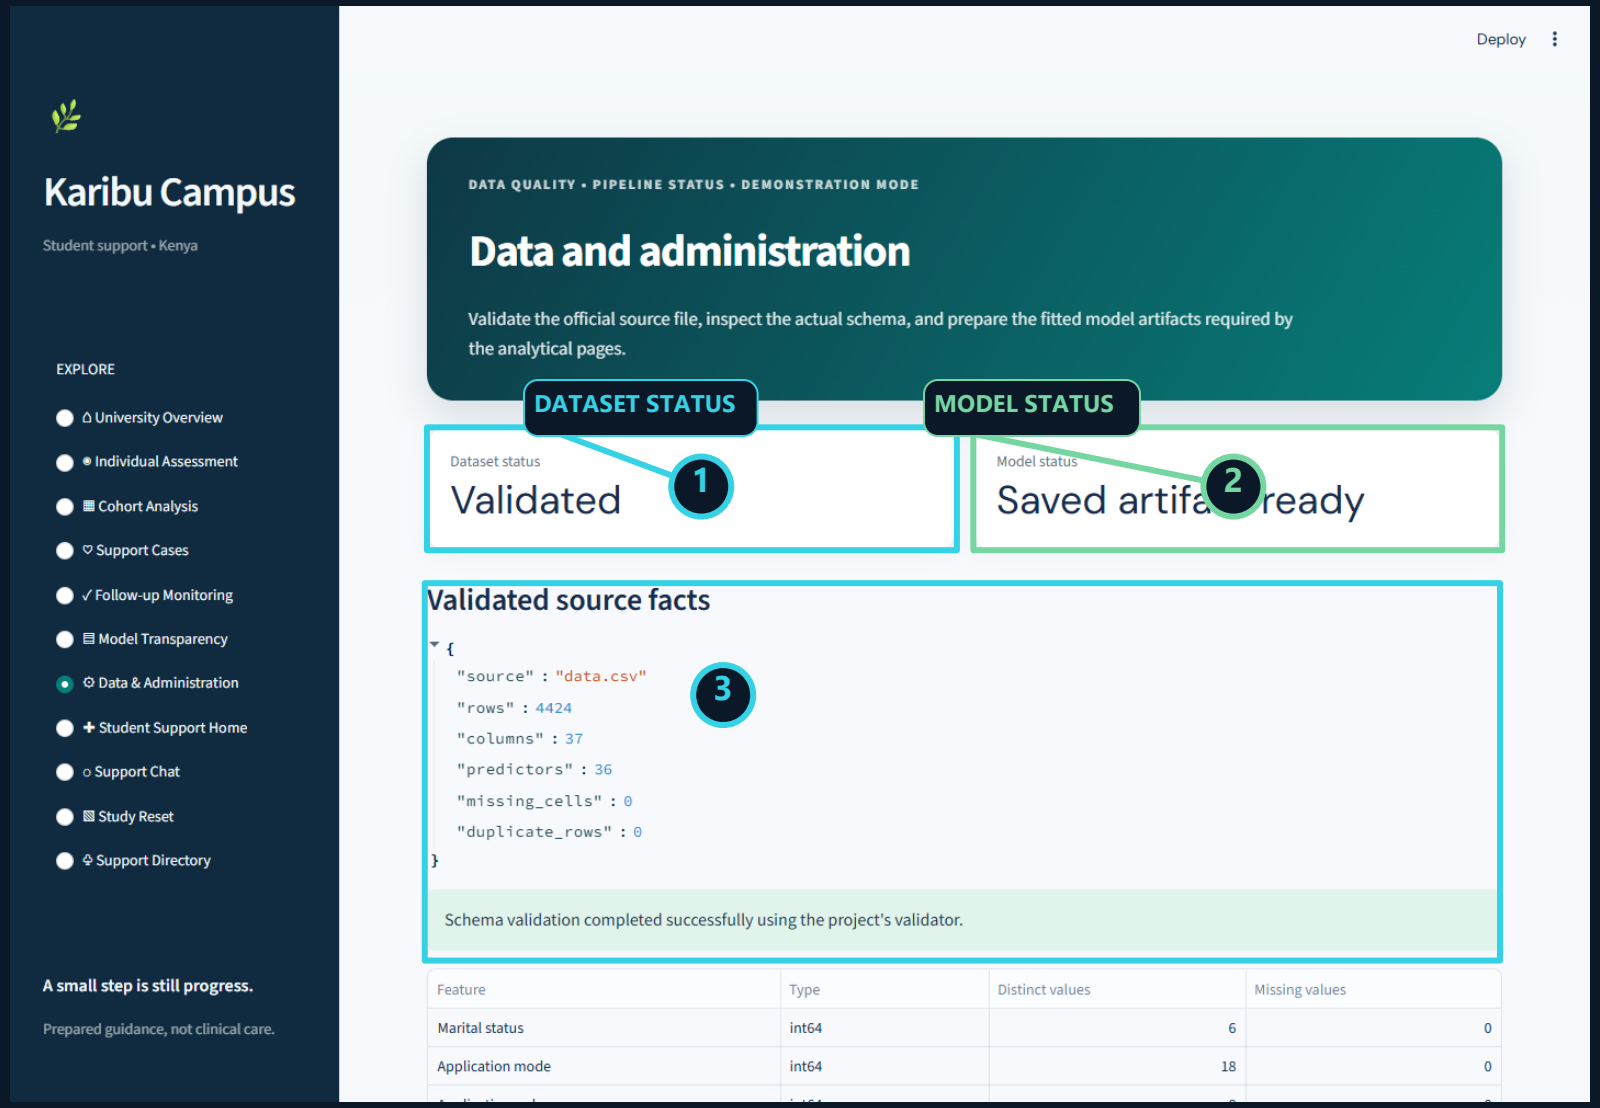

SAY

"This directory points students toward people and current provider information."

LOOK FOR Campus route + resource categories.

Do not invent campus contacts; verify provider details.

Data & Administration

FOLLOW THESE ACTIONS

1. Click Data & Administration in the sidebar.
2. Check Dataset status and Model status.
3. Point to validated source facts: 4,424 rows, 36 predictors, 1 target.

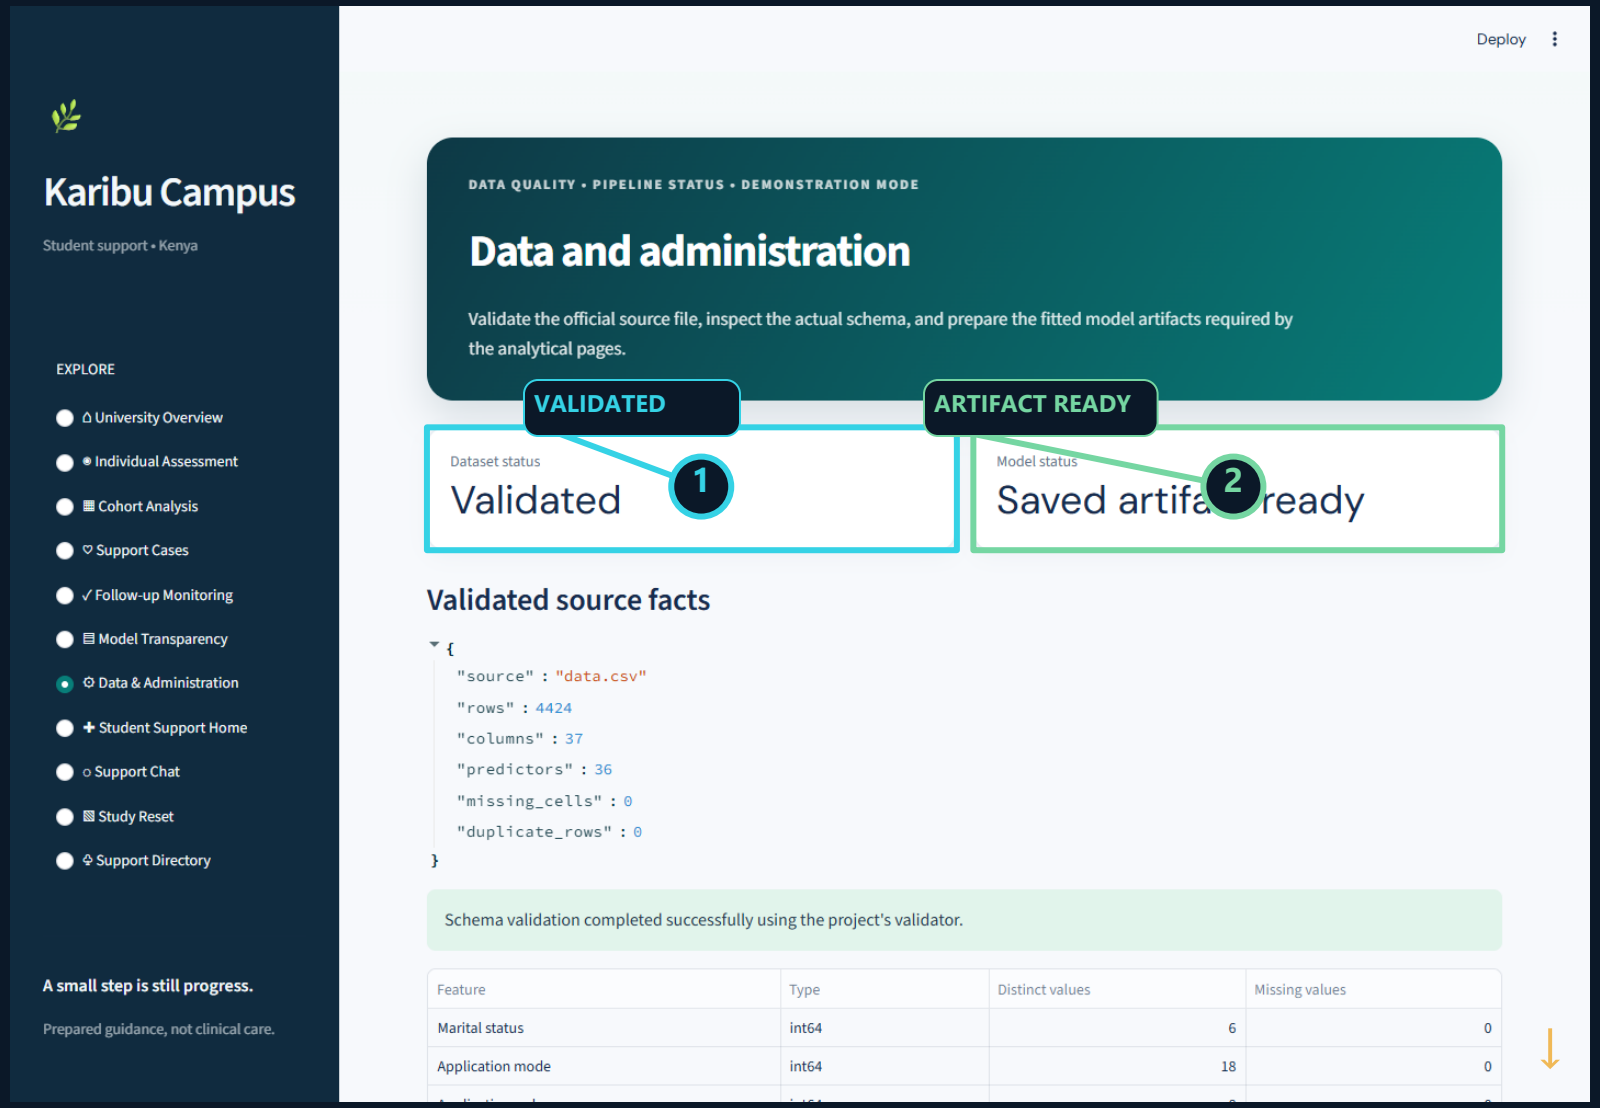

SAY

"The model dataset is from a Portuguese higher-education institution—not a Kenyan campus cohort."

LOOK FOR Validated file + saved model status.

Download button appears only when the CSV is missing.

Prepare dataset and train model

REPRODUCIBLE RUN

1. Download official UCI CSV (only if absent)
2. Validate rows, schema, labels and quality
3. Fit preprocessing + compare 3 classifiers
4. Stratified 5-fold CV; held-out test: 885 rows
5. Save fitted pipeline and evaluation artifacts

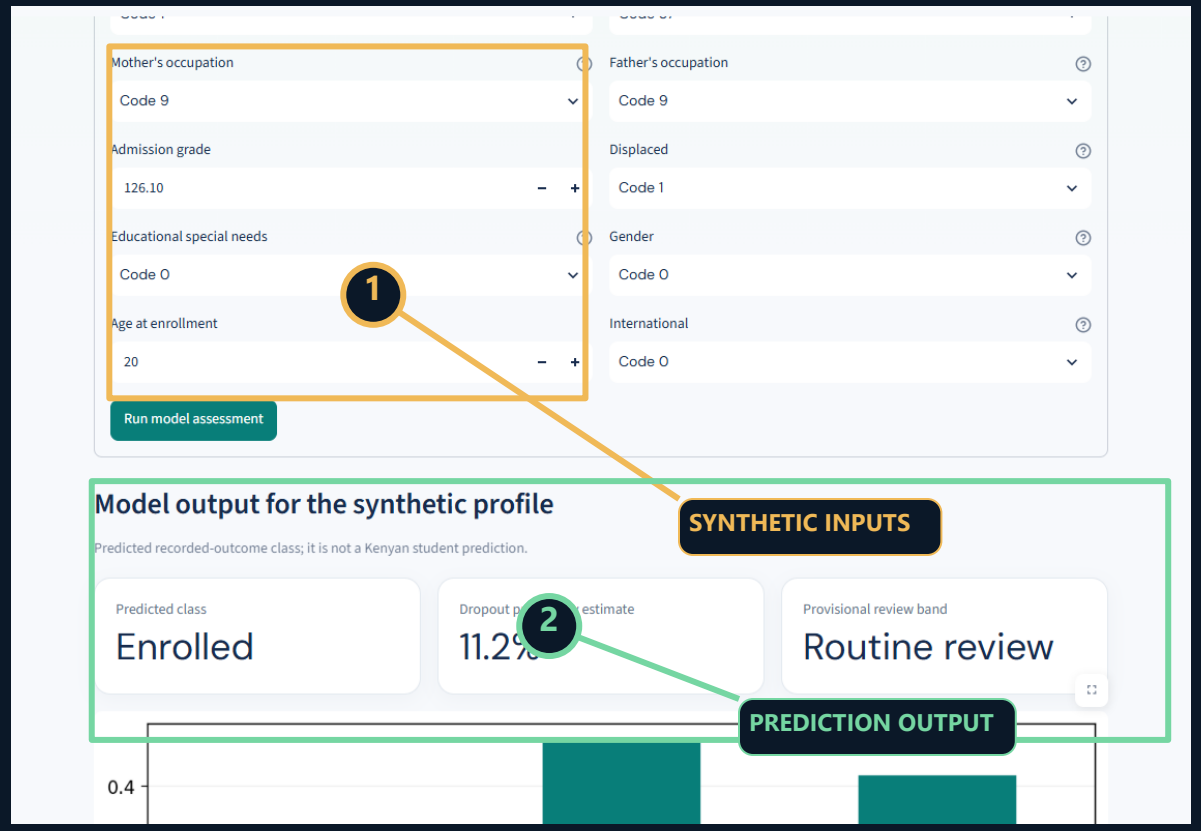

CONTROL IS BELOW THE CAPTURED VIEW

Scroll past the schema table → click “Prepare dataset and train the model”.

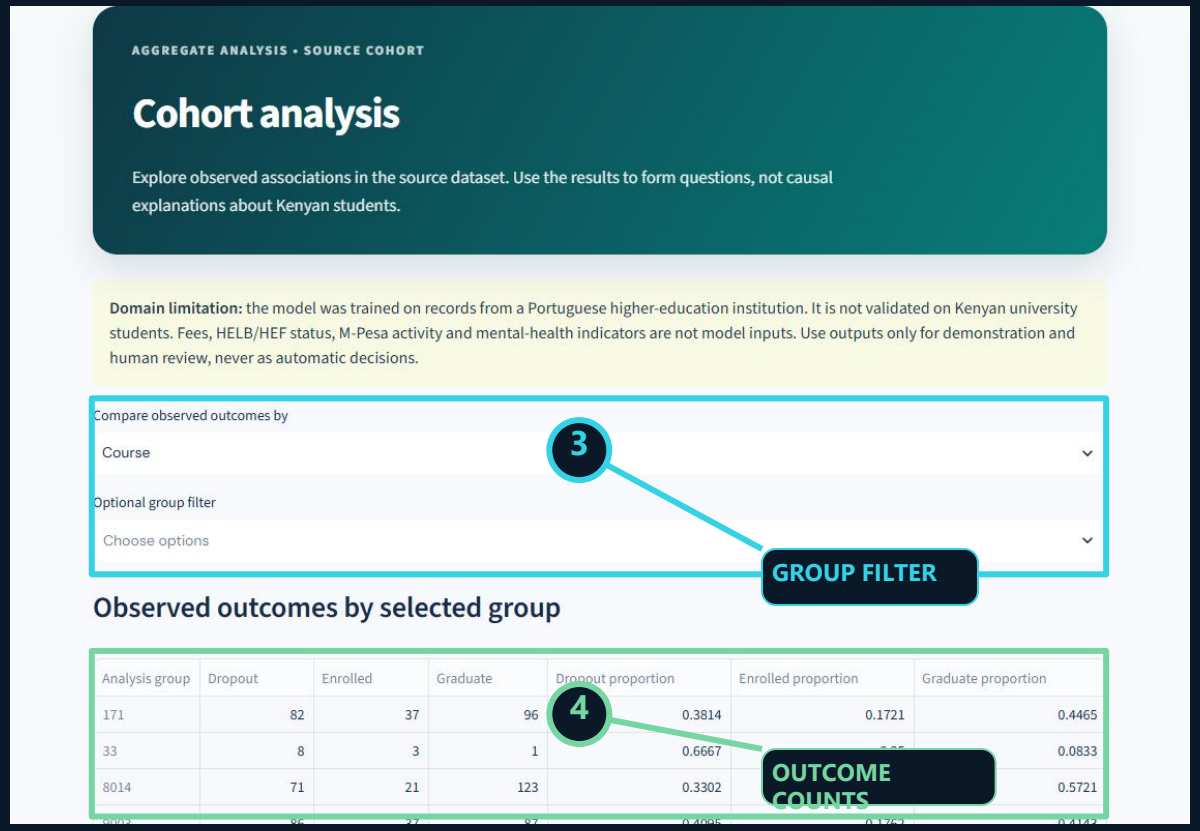

For the timed demo, prepare artifacts beforehand; show the ready status.

Individual Assessment + Cohort Analysis

A • INDIVIDUAL ASSESSMENT

B • COHORT ANALYSIS

USE THE PREFILLED SYNTHETIC PROFILE

Run assessment → show class, estimated dropout, band + 3-class chart.
Example capture: Enrolled • 11.2% • Routine review.

READ COUNTS WITH PROPORTIONS

Choose Course (or another supported group); inspect chart + table.
Descriptive patterns only—no causal or Kenya-transfer claim.

END: "That is the walkthrough. I'm happy to take your questions."
